Skills

- React
- JavaScript
- Ruby on Rails
- CI/CD Pipelines
- PyTorch
- Python
- FastAPI
- Node.js
- AI/LLM Integration
- Scikit-learn
- C#
- .NET
- SQL
- Docker
- AWS

Experience

Deloitte (Los Angeles, CA) — *Software Engineer* April 2023 - Present

- Developed the Socium app for the Defense Security Cooperation Agency using React-Typescript frontend, Python-Flask backend
- Independently migrated a large React application from Create React App (CRA) to Vite, significantly improving development speed
- Presented new software features to 150+ clients to maximize client engagement
- Developed flexible, reusable frontend components that replaced a paid third-party library, reducing project costs and improving maintainability
- Wrote SQL queries for visualizing data using pgAdmin 4

Leidos (Mechanicsburg, PA) — *Software Engineer* July 2021 - April 2023

- Developed the Defense Property Accountability System using C# (.NET Framework), Entity Framework, Microsoft SQL Server, Javascript, HTML and CSS
- Modernized a monolithic application using .NET microservices
- Obtained a U.S. Government Secret Clearance

Education

Cal State Polytechnic University, Humboldt (Arcata, CA) 2021
Bachelor of Science | Business Administration

General Assembly (New York, NY) 2021
Software Engineering Bootcamp | Certificate of Completion
